YOUR TASKS

- Independent planning, organization, and management of material development projects (focus on plastics) and compound development
- Hands-on work using plastic-specific technical lab equipment (e.g. single-screw extruder, co-kneader, internal mixer for elastomers)
- Development of new formulations and optimization of existing ones
- Execution of projects in collaboration with suppliers, customers and R&D centers, as well as active expansion of an international expert network through committees, conferences and trade fairs
- Designing, supervising, and mentoring thesis projects and internships
- Theoretical evaluation and practical testing of innovative technologies in the plastics sector
- Preparation and professional presentation of research and development results, both internally and externally

YOUR PROFILE

- Completed technical education (technical college/university of applied sciences/university) in materials science, plastics engineering, or organic chemistry
- Ideally, professional or research experience in the field of polymers or materials
- Fluent in German and English
- Solution-oriented, creative, and proactive mindset with a strong sense of curiosity
- Reliable personality with clear and persuasive communication and reasoning skills
- Strong analytical abilities and a structured way of working

OUR OFFER

- Start date: from October 1st, 2025
- Exciting and challenging role in an international environment
- Flexible working hours without core hours, mobile work options and time compensation
- Comprehensive onboarding with a structured training program and buddy system
- Attractive internal and external training opportunities
- Regular cultural, sports, and health programs (on-site company doctor, cafeteria incl. meal subsidies)
- Possibility to work remotely from abroad (workation)
- Our anonymous Employee Assistance Program (EAP) offers professional support for both work-related and personal matters (<https://eap.world/eap-fuer-beschaefigte/>)
- Salary is based on your qualifications and experience and will be discussed personally. According to the collective agreement, the minimum salary is € 3.775,27 gross per month.
