Internship R&D and QA building materials industry

Dear Ladies and Gentlemen,

BAUMIT has been operating successfully as a leading, continuously expanding, sustainable and innovative company in the building materials industry both nationally and internationally for decades. In our innovation center, we are setting new standards in research and development in the building materials and building industry.

BAUMIT is one of Europe's largest building materials and technology groups with activities in the fields of external thermal insulation composite systems; pasty plasters & paints; dry mix mortar: plasters, mortars, adhesives, fillers, screeds, dry concretes; binders: cement, lime, gypsum; 3D printing with concrete/mortar and automation solutions for building material applications (Construction Automation).

For our **Headquarter in Wopfung** (near Wr. Neustadt, Lower Austria), we are looking for interns for the months of July, August and September 2026 in the following areas:

- **Research & Development of building materials/construction of prototypes for construction automation**
- **Quality assurance of building materials/drymix mortar/pasty products**
- **Quality assurance of cement**

Please send applications with a CV & motivation letter to the email address below by the end of February 2026.

Also, state the exact period you would like to work for. We prefer 3- or 2-month internships.

Best regards,

Dipl.-Ing. Peter Weissmann

Chief R&D Officer Baunit Group
